

## Results Measurement Workshops 2024

The DCED invite you to four free, interactive, 1.5 hour workshops this spring, covering different elements of results measurement and lead by subject experts.

### AI for Monitoring Results and Learning

*Tuesday 16<sup>th</sup> April 2024, 13:00 BST*

**Register here:** <https://us02web.zoom.us/meeting/register/tZMvc-ChrTwvH93oNgoiP57cJ0C3lqmWG4ZA>

In the last twelve months, many of us have heard of or experimented with chatbots powered by artificial intelligence. How can they help us in measuring results using the DCED Standard? What are the best techniques to use, where do they work well, and what are the limitations? We will explore these questions in an interactive session - come prepared to share your experiences.

Adam Kessler co-founded and runs DevLearn, a consulting firm working in inclusive economic growth. He is a monitoring and evaluation specialist with experience developing simple, practical results measurement systems for private sector development programs. He has extensive experience in providing online training and workshops for MEL practitioners.

### Data Visualisation for Results Communication

*Tuesday 7<sup>th</sup> May 2023, 14:00 BST*

**Register here:** [https://us02web.zoom.us/meeting/register/tZUpcequpjsvH9BncHmCBIUmXFmxVekkLDc\\_](https://us02web.zoom.us/meeting/register/tZUpcequpjsvH9BncHmCBIUmXFmxVekkLDc_)

How can we present and capture insights from our data most effectively? Explore the fundamental principles of data visualization for results communication in this workshop, which offers a hands-on experience exploring different visualization types through realistic and relevant examples.

Yuni Chairani is a MEL practitioner with eight years of experience. She started her career in MEL as an MRM focal point for agri interventions in PRISMA Indonesia - the largest MSD program funded by DFAT. As a MEL consultant, she has managed and supported more diverse and complex programs, including for international NGOs and institutional donors. She has worked with Devlearn consultancy since 2022, where she has facilitated MEL online training with hundreds of participants across the globe.

# Using Qualitative Research Methods for Deeper Insights

*Tuesday 28<sup>th</sup> May 2024, 13:00 BST*

Register here: <https://us02web.zoom.us/meeting/register/tZwucO-gpzojE9J-LLQPZQ-meHxgFR7bTU0J>

How do we choose which qualitative methods to use? When do we use them? And how can we best plan qualitative research? Join this interactive session to talk about how qualitative research can be applied robustly to uncover rich insights and narratives from diverse sources.

Sadia Ahmed, leading this workshop, brings 17 years of experience in designing research for business growth strategies and advising projects on their monitoring and evaluation strategies. Sadia has long been a core team member of Opportunities Unlimited B.V., providing specialized technical support to programs. She is currently studying for a Masters in Sustainable Energy Policy at Carleton University in Canada.

# Capturing Wider Change in the System

*Monday 10<sup>th</sup> June 2024, 09:00 BST*

Register here: <https://us02web.zoom.us/meeting/register/tZYIdeGprjMoG93wcQjGr9itNCWtoJMwhxZj>

Many of our programs aim to catalyse system changes. But how do we clearly describe expectations with measurable indicators? And how do we assess progress regularly and efficiently with limited resources? Inspired by "[A Pragmatic Approach to Assessing System Change](#)", this interactive workshop will explore practical methodologies, tools and templates for assessing system changes.

Alexandra Miehlbradt (Aly) has worked in inclusive economic development for 30 years and is a leader in the global effort to improve monitoring and results measurement and the effective use of information in MSD. She has helped a wide variety of organisations - both programs and donors - to develop or improve their design, monitoring, results measurement and adaptive management systems. Aly is a Director at [Miehlbradt Consulting Ltd.](#) and a member of [The Mazi Group](#).

Phitcha Wanitphon has over 25 years of experience in the private sector and private sector development. Phitcha has been instrumental in testing, developing and rolling out the DCED Results Measurement Standard since its inception in 2008. As a consultant, Phitcha focuses on training, advising and coaching programs in developing appropriate results measurement systems that are use-friendly, effective and inform management. Phitcha is also a member of [The Mazi Group](#).
